PROFESSIONAL SUMMARY

Motivated Software Engineer skilled in Python and MySQL, with strong problem-solving abilities and a passion for collaboration on team projects. Adaptable and eager to learn, I am committed to continuous growth in computer science. Ready to contribute innovative ideas and drive impactful software solutions.

EXPERIENCE

Alephys <i>Data Engineer</i>	07/2025 – Present Hyderabad
--	--------------------------------

- Gained hands-on experience with Linux, Confluent Platform demo, and Apache Kafka.
- Worked on practical use cases in data streaming and messaging systems.
- Collaborated with engineers on real-time data projects, improving understanding of distributed systems.

360digrii <i>Python Full-stack - Trainee</i>	02/2025 – 07/2025 Hyderabad
--	--------------------------------

EDUCATION

CMR Technical Campus B. Tech - Computer Science and Engineering Aggregate CGPA 8.0	2022–2025
--	-----------

VNRVJIET Diploma - Civil Engineering Aggregate CGPA 9.27	2019–2022
--	-----------

Oxford High School SSC Aggregate CGPA 9.8	2019
---	------

SKILLS

- Programming: Python, C, C++
- Operating Systems: Windows, Linux
- Databases: MySQL (DDL, DML, Joins, Aggregations)
- Tools & IDEs: Git, GitHub, VS Code, Anaconda, Spyder, Jupyter Notebook
- Web Technologies: HTML, CSS, Django (MVT, URL Routing, Models, Views, Forms)
- Data Engineering: Apache Kafka, Kafka Connect, Kafka Streams, Confluent Platform (CP Demo), Kafka Producers & Consumers

PROJECT EXPERIENCE

E-Commerce Website

- Built a Django-based e-commerce platform with user authentication and role-based access for vendors and customers.
- Developed product management features for vendors to add, edit, delete, and track product stock (with base64 image storage).
- Implemented shopping cart and order system with add-to-cart, quantity updates (+/-), and automatic total calculation.
- Designed responsive UI using HTML and CSS.
- Added smooth navigation, user profiles, and session-based login/logout for a better shopping experience.

Rental Website

- Built a responsive rental website using HTML and CSS.
- Used media queries and flexible grids to ensure mobile-friendly layouts.
- Added CSS styling, hover effects, and basic animations for improved UI.

Email Spam Detection and Classification Using Machine Learning

- Built a spam detection system using Python and machine learning.
- Cleaned and preprocessed email text to improve classification accuracy.
- Converted text into numerical features using TF-IDF.
- Applied a Genetic Algorithm for optimal feature selection.
- Trained a Random Forest model to classify emails as spam or not spam.
- Tested the system on a real-world email dataset for reliable performance.
- Tech Used: Python, TF-IDF, Genetic Algorithm, Random Forest, Google Colab.

CERTIFICATIONS

Certificate for the Completion of HTML Training — IIT Bombay (2023)

Certificate for the Completion of C Training — IIT Bombay (2022)

English Language for Competitive Exams — NPTEL (2022)

Problem Solving with C++ Programming Language — Udemy (2024)

SmartCoder Certification — Smart Interviews (2024)

Cybersecurity Foundation Course — Pre-work — IBM SkillsBuild (2024)
